

Cristian Nambo, Software Engineer

346-332-4139 · Katy, TX 77449 · [Email](#) · [LinkedIn](#) · [GitHub](#) · [E-Portfolio](#)

My background is as an engineering tech in oil and gas, and through that job I started to partner with software engineers as they troubleshooted and solved problems with our machines. I really enjoyed that type of thinking and researched how I could get into coding. I started learning on my own and then made the jump to learn full time at a coding bootcamp, General Assembly. My goal is to be the next problem solver in tech!

SKILLS

Languages - JavaScript, HTML, CSS, React, Python, Ruby on Rails

Libraries and Frameworks - Node.js, Express, Bootstrap, Django

Database - MongoDB, Mongoose, PSQL, SQL

Other - RESTful API's, JSON, GitHub, GIT, EJS, AJAX, SASS, OOP

SOFTWARE DEVELOPMENT PROJECTS

Skate-React [View-Project](#)

- Created a Full-Stack Application using Javascript, CSS, React, Mongoose / MongoDB, Firebase auth
- Implemented team collaboration and brainstormed ideas and solutions
- Created logic to implement the ability of a single user sign-in using Google Firebase
- Implemented of full CRUD functionality

Car Collector [View-Project](#)

- Created an application using Python, Javascript, Django, CSS, HTML, PSQL, AWS
- Used Python to implement logic for forms and route logic
- Rendered user Form data based on inputs
- Used authentication and displays certain items based on if the user is logged in

E-Portfolio [View-Project](#)

- Created a application using HTML, CSS, and CSS animations
- Used best practices with naming conventions and class names

PROFESSIONAL EXPERIENCE

Engineering Tech | NOV | Houston, TX

February 2021 - March 2022

- Worked closely with engineers to problem solve equipment and pressure leaks.
- Offered solutions and input to the engineers based on the experience testing the pressure equipment.
- Exercised daily attention to detail and recording data to present to engineers for review.

Mechanical Assembler | Toshiba | Houston, TX

March 2019 - January 2021

- Collaborated with a team to assemble and ship out customer orders in a timely fashion.
- Brought up issues to engineering and offered potential solutions regarding future production.
- Built custom drives according to customers wants and needs while contributing data for future builds.

EDUCATION

GENERAL ASSEMBLY | Remote

Completed July 2022

Full-stack software engineering immersive student in an intensive, twelve-week, 450+ hour program focused on product development fundamentals, object-oriented programming, MVC frameworks, data modeling, and team collaboration strategies. Developed a portfolio of individual and group projects.
